Mission, Vision & Values

Mission

Champlain Regional College is a public, English-language, post-secondary institution that provides pre-university and technical college-level education and training, primarily in English, to learners in both Regular Day and Continuing Education programs. The College, through its unique multiregional structure, responds to the needs of diverse linguistic and cultural communities and contributes to the educational and socio-economic development of the regions of Quebec served by Champlain College Lennoxville, Champlain College Saint-Lambert and Champlain–St. Lawrence College. The College is dedicated to fostering the individual success of its students and their development as well-rounded, responsible and informed citizens of the world.

Vision

Passionate in its commitment to students, and inspired by its mission and values, Champlain Regional College aspires to

- Offer unique and innovative high-quality programs and services;
- Graduate students who are recognized for the excellence of the knowledge and skills they have acquired;
- Attract and retain outstanding faculty and staff; and
- Be a learning-centred college.

Values

The College values

LIFELONG LEARNING for students, faculty and staff through personal growth and professional development;

EXCELLENCE through striving for continuous improvement;

RESPECT for all individuals, manifested through open communications and a commitment to fairness, justice and honesty;

CARING through compassion, courtesy and friendliness and a commitment to the wellness of students, faculty and staff;

COLLABORATION in the achievement of shared goals and objectives;

STEWARDSHIP through the responsible and effective use of human, physical, environmental and financial resources; and

A SENSE OF COMMUNITY AND TRADITION within and among all locations of the College.

About the College

Champlain College Saint-Lambert is a constituent of Champlain Regional College, located on the South Shore of Montreal within a short 10-minute walk from the Longueuil-Université de Sherbrooke Métro station. The constituent College offers both pre-university and technical DEC programs through the regular division as well as attestation of studies (AEC), recognition of acquired competencies courses (RAC), and non-credit courses and activities through the Continuing Education Department. There are approximately 3,000 students enrolled at Saint-Lambert.

Champlain College students come from diverse cultural backgrounds and speak various languages, which provides the constituent College with a friendly, enriching, and multicultural environment where students meet new people and live new experiences. At Saint-Lambert, we believe our size is our strength. Teachers can take the time to get to know their students and give them personal attention and feedback. Students also have easier access to a variety of support services, such as tutoring, counselling, academic advising, library services, and athletics.

It's All About Your Success

Our goal is your success. Champlain College Saint-Lambert provides students with a range of services to help support their academic endeavours and personal growth. Whether a student needs additional help outside the classroom, guidance in choosing a career path, or more information about getting involved in campus life, experienced and friendly staff are always there to lend a hand. We encourage all students to take advantage of the resources and supportive services provided by the Registrar's Office, Student Services, the Learning Centre and the Library.

Champlain at a Glance

LANGUAGE

Champlain College is the only English college on the South Shore of Montreal.

STUDENT POPULATION

- Approximately 3,000 students
- Multicultural Environment

PROGRAMS OFFERED

- 13 two-year pre-university programs
- 4 three-year career programs

College Services

First-Year Student Orientation

First-Year Student Orientation is designed to help new students transition smoothly into college life. It offers an opportunity to meet the FLIP (First-Year Leadership Integration Program) team, CSA (Champlain Student Association) representatives, and connect with faculty and staff. Students will be introduced to key services such as the Library and the Registrar's Office, where they can meet with an Academic Advisor to learn about academic expectations and resources. Hosted by second and third-year students, the orientation takes place in a friendly, community-focused setting that encourages engagement and connection with peers.

The First-Year Leadership and Integration Program

The FLIP program supports new students at Champlain College Saint-Lambert by offering year-long activities and peer-led initiatives to ease the transition into college life. As a key part of First-Year Orientation, FLIP promotes academic success, student engagement, and overall well-being. Led by trained student leaders, the program fosters a sense of community through weekly meetings, group activities, and opportunities for involvement on campus and off campus. FLIP Leaders also serve as ambassadors of the program and the Champlain community.

Career Planning

Some students come to Cégep with an idea of what they want to do and which career path they wish to pursue, but many students are unsure or confused about which path to take. Career planners will guide students through this process, help them develop a career plan, explore their options through standardized tests, self-reflection, researching careers using online tools, meeting professionals, and exploring experiential opportunities, such as

volunteering or workshops and discussion. Career planning is done in groups but can lead to individual sessions where necessary.

Study Skills

Personal issues or other factors such as time management difficulties, exam/class anxiety, and procrastination may compromise a student's academic performance. Students may also struggle with study skills such as note-taking, organization, preparing for exams, and reading a textbook. The Student Services staff is here to help you through these issues.

Mental Health Services

Licensed psychologists, psychotherapists and social workers are available to work with students to overcome difficulties associated with mental health and well-being. The mental health team is here to listen and explore issues with students in a supportive, confidential, non-judgmental way. They collaborate with students to clarify the concern(s) and to help students express their feelings. They assist them in viewing the issue from different perspectives, to explore and identify goals for change, and to determine an appropriate plan of action. The plan of action may include counselling/psychotherapy within the College and/or referral to an outside community resource. Some of the issues that students bring forth include: depression, anxiety, stress, trauma, transition/developmental difficulties, suicidal thoughts, interpersonal relationships, family concerns, sexuality and gender, diversity, self-esteem, time management, exam/class anxiety, procrastination, study skills, and/or motivation.

Student Services

Champlain College takes pride in providing a favourable physical and learning environment where academic and personal development can occur hand in hand. Student Services at Champlain has everything to help you continue your learning outside the classroom, get involved on campus, find out more about yourself, address your mental health and well-being or enhance your college experience. Student Services provides a range of support areas, including services for students with special needs, mental health and well-being, personal and career counselling, and health services. Additionally, it addresses prevention of sexual violence, offers financial aid counselling, and oversees intercollegiate athletics, recreation and intramurals, and student & campus life.

Housing

The Student Services Department occasionally receives and publishes advertisements from local advertisers, which may assist you in locating apartments and rooms in the vicinity of the college. The facilities listed are not inspected by Student Services nor the College. The lease that you sign or the arrangement that you undertake in the case of a private home is your responsibility. When looking for lodging you might like to consider the type of housing you would prefer, whether it is a room in a private home or renting an apartment with a roommate; if meals and services (internet, cable, etc.) are included; laundry; proximity to the college and to conveniences; parking; access to public transit; noise level; etc. You can find the Housing Registry on our website at www.champlainsaintlambert.ca

Academic Advising

Academic Advisors assist students in a number of areas related to program progression, course selection, academic performance, as well as university and scholarship applications. During the year, academic advisors invite university representatives to the campus to inform students about the various programs offered and to answer questions concerning university admissions.

Student Access Centre

The Student Access Centre (SAC) at Champlain College promotes equitable access to education and student life and fosters an environment of inclusion and respect.

Students who may require an Individualized Education Plan (IEP) for academic accommodations should register with the Student Access Centre (SAC) to support their success. The SAC Counsellor is responsible for assessing, establishing, and supervising the implementation of appropriate academic accommodations which may include test accommodations, specialized software, support for study skills strategies, and/or academic coaching.

Students may be eligible to have accommodations if they had an IEP in the past or if they have a medical diagnosis or undiagnosed limitation. Other students who face circumstances that may impact their success, such as adults returning to school, allophones and single parents, should also contact the SAC.

Students should contact the SAC as soon as they are admitted to Champlain. Please email to sac@crcmail.net, send a MIO to SAC, or call 450-672-7360 ext. 3446.

Health Services

The College Nurse is on campus two days per week and is available to discuss the health concerns of our students in a safe and confidential environment.

Services include:

- Discuss any health preoccupation, assess the situation and refer if necessary.
- Health counselling for tobacco prevention/cessation, nutrition/fitness, eating disorders, stress and birth control.
- Giving information about/discuss matters of sexuality.
- Educate about how to prevent sexually transmitted infections (STIs).

Learning Centre

Champlain College Saint-Lambert offers many resources designed to aid students on their path to success. One of these valued resources is the Learning Centre, located in Room B-309 on the library's second floor. The centre provides free individual peer tutoring (in-person and online) by appointment or drop-in service. Tutors are skilled in Calculus, Physics, Psychology, Economics and many other subjects. In addition to instruction on course content, tutors can help students with study skills, time management, work habits, exam preparation, websites for practice skills and computer access availability.

Centre de ressources en français - Langue Seconde

Le Centre de ressources en français langue seconde (CRF) offre aux élèves un service de coaching individualisé afin de pallier des lacunes en français dans le cadre de leurs cours. Des séquences d'enseignement adaptées aux besoins particuliers des élèves sont créées à l'aide du matériel et des ressources fournies par le département de français. Les coachs du CRF sont des élèves provenant des cours de français de niveau avancé et sont supervisés par un.e professeur.e de français.

Centre de ressources en français - Langue et Littérature

Le CRF-Langue et littérature offre un service de tutorat individuel et personnalisé s'adressant aux élèves d'UF0, UF1, UF2 et 103A. Il est offert par deux enseignantes du Département de français du collège et couvre toutes les étapes de la rédaction d'une dissertation (identification et analyse des procédés stylistiques, choix et intégration des citations, formulation des idées, etc.) ainsi que les points de langue à l'étude.

Writing Centre

The Champlain College Writing Centre is affiliated with the English Department and The Learning Centre. The Centre provides peer tutoring to students in need of help and guidance with all aspects of academic writing and English communication. Specifically, writing tutors help students with citations, annotated bibliographies, paragraph writing, synthesis writing, proofreading, brainstorming activities, revision of essays, grammar instruction, and word choice issues.

Onkwehón:we Initiatives

The original people/Indigenous people Initiatives

Champlain College Saint-Lambert places a high priority on embracing Onkwehón:we (The original people/Indigenous) ways of life both within and beyond the classroom. Our commitment to cultural knowledge and understanding the histories of this land demonstrates our active support for the Truth and Reconciliation Commission of Canada. At Champlain, we have fostered a supportive and encouraging environment for Indigenous students. We provide academic assistance, address transitional barriers, and provide full time support with the new position of the Indigenous Student Life Counsellor.

By celebrating and incorporating the beautiful and diverse cultures of Indigenous nations across Turtle Island, we aim to strengthen the connection between Indigenous students and their heritage, while providing an opportunity for non-Indigenous community members to expand their knowledge and understandings.

The collaborative efforts of our faculty, staff, and the dynamic Community of Practice committee are instrumental in supporting our Champlain Indigenous Student Ambassadors. These ambassadors play an active role in the community by offering support to first-year students, organizing Indigenous Orientation Retreats, and establishing partnerships with Indigenous students from other Cégeps and organize a multitude of workshops with Kahnawa'kehró:non (community members of Kahnawà:ke).

One of our notable initiatives is the week-long event led by the Indigenous Student Ambassadors called "Shé:kon Kèn:'en Itewe's" (We Are Still Here). This event focuses on sharing Indigenous histories and raising awareness about Residential Schools. It features workshops and various activities that culminate in a College-wide ceremony on National Truth and Reconciliation Day. During this time, we gather to honor the Indigenous children who never returned home and show our respect for the survivors. Additionally, the George Wallace Library hosts an expanding Truth & Reconciliation Collection, accessible through the Champlain TRC Community of Practice link on the Omnivox Portal. Throughout the remainder of the academic year, onkwehón:we workshops and guest speakers are organized to reclaim Indigenous voices and narratives in post-secondary education.

We continually incorporate new ideas and course components addressing Indigenous issues into our evolving curriculum. By doing so, we strive to cultivate students who:

- Recognize and respect diversity.
- Embrace individual differences with openness.
- Value Reconciliation and understand the significance of Truth in today's historical context.
- Contribute to Reconciliation efforts by engaging in Indigenous Education and Culture.

George Wallace Library

George Wallace Library, named in honour of George W. Wallace, a former Champlain College Saint-Lambert teacher and Campus Director, is located on the second and third floors of B-Block. New to research? The librarians and technicians are available for in-person or online (email, MIO, or live chat) to provide assistance for all your research projects. You will receive training in the basics of research and academic integrity as an integral part of the first-level Humanities course. Other teachers may also arrange for course-specific library instruction in other subject areas.

The library website provides essential information connecting you to a variety of resources (in both English and French), tools, and guides for you to use while researching assignments and writing bibliographies. There is plenty of space for individual study, with a beautiful view of the ships passing on the St. Lawrence Seaway. If you need a computer to use in the library, borrow a laptop for 2 hours (renewable). Print your documents in black and white or colour using the printing credits issued to you by the college every year.

General Education

What is the purpose of the General Education Component?

Regardless of which educational path you choose to follow, you will take both program-specific courses and general education courses. General Education is an essential component directly linked to the three main goals of college education:

1. To educate students to live responsibly in society.
2. To help students integrate cultural knowledge into their studies.
3. To help students master language as a tool for thought, communication and openness to the world.

Your English, French, Humanities, Physical Education and Complementary courses are designed to help you develop competencies associated with these goals.

Components of General Education

English
French
Humanities
Physical Education
Complementary

General Education Courses

English Courses

At the start of their program, students are all placed in the Introduction to College English course, which introduces them to thinking, talking and writing about literature at the college level. Upon successful completion of this course students go on to studying:

Literary Genres

The objective of Literary Genres courses is to enable students to apply a critical approach to the study of literary genres. Students will learn to recognize literary genres and their conventions. Successful students will understand a work's relationship to literary and historical context.

Literary Themes

The objective of the Literary Themes courses is to enable students to apply a critical approach to the study of literary themes. Students will learn to recognize a work's literary themes, cultural context and value system. Students will analyze a text from a thematic perspective.

Program Specific - Block B

The objective of the Block-B courses is to enable students to develop their skills in reading and analyzing texts related to one or more fields of study. Students will draw on their program-specific knowledge to develop and organize their ideas, with attention to relevant rhetorical strategies, forms, and conventions.

French Courses

French is an important component in Quebec society and an essential General Education element for students to obtain their Diploma of Collegial Studies (DEC).

Students must complete a French course sequence based on their academic background and English instruction eligibility.

In accordance with Law 14, students without certificates of English eligibility will complete a French course sequence that will prepare them to successfully complete the French Exit Exam (l'Épreuve uniforme de français).

In contrast, certificate holders will be placed in a French proficiency level based on their high school marks and write the English Exit Exam.

All students will complete five courses in French during the course of their studies as required.

We strongly recommend you speak to an Academic Advisor if you have questions regarding your academic path.

Humanities Courses

The Humanities courses are developed around three major themes – Knowledge, Worldviews and Ethics. Students must take one course from each of these categories.

Knowledge

Courses in this group examine ways of knowing, ways of assessing knowledge and truth and the difference between knowledge and belief. Students will begin to understand how knowledge can be organized, analyzed and related to historical context. Students will consider how knowledge is used to restrict or contribute to the progress of a society.

Worldviews

A worldview touches every aspect of a person's life. A worldview may be common to an entire civilization or historical period, or specific to a particular social group or philosophical outlook. Courses in this group examine how ideas, values and experiences inherent in a worldview influence an individual's understanding of the world. Students will analyze and compare the central ideas of two or more worldviews with the goal of understanding how worldviews both reflect and shape societies.

Humanities Block-B - Program Specific

Courses in this group require students to examine the connection between ethical choices and social responsibility. A number of theories and principles of ethical decision-making are introduced. Students are required to consider opposing sides of issues related to their program of study by applying ethical theories.

For detailed course descriptions please see the course catalogue on champlainsaintlambert.ca

Physical Education Courses

The three Physical Education courses of the General Education component aim at getting students to develop an active and healthy lifestyle. The 101 course involves identifying the role that certain lifestyle behaviours, such as regular physical activity, good nutrition and stress management, play in the pursuit of optimal health and well-being. Students will examine the health and wellness effects derived from participation in regular physical activity and will explore the effects of their current lifestyle habits.

The 102 course is skills-oriented. Each student will be expected to analyze the factors that contribute to the acquisition of skills to be a successful participant in their chosen activity. Using a problem-solving approach, the student will conduct a personal analysis of their knowledge and abilities, establish personal goals, and plan strategies leading to the improvement of those skills.

The 103 course addresses the competency of designing and managing a personal activity program that incorporates healthy lifestyle choices. This course contributes to the development of responsible behaviours leading to the promotion and improvement of health. The learning situation will require the application of fundamental knowledge and experiences acquired in the 101 and 102 Physical Education courses. The student will explore a variety of health-related activities and be responsible for choosing, performing and scheduling activities appropriate to meet personal needs, interests and abilities. To respond to students' diverse interests, abilities and motivations, Champlain Saint-Lambert offers a wide range of courses – downhill skiing, snowboarding, water front activities, basketball, badminton, total body conditioning, soccer, ice activities, golf, hiking, yoga, weight training and canoe camping.

COLLEGESAINTE-LAMBERT

Science Options - Health Science or Pure & Applied Science

About the Program:

The pre-university Science Program at Champlain Saint-Lambert lays a solid groundwork for students aiming to further their studies in science-related fields at the university level. You will study scientific problems using a diversity of approaches and methods, the way professional scientists do. With courses offered in Biology, Chemistry, Computer Science, Mathematics, and Physics, you will gain an understanding of the natural world and the scientific skill set required to further your academic success, no matter where your interests take you. Regardless of your future academic or professional trajectory, completion of the Science program at Champlain Saint-Lambert will provide you with the necessary tools to become a scientifically minded citizen.

Science Options – Health Science or Pure & Applied

Two distinct streams of scientific study are offered: Health Science and Pure and Applied Science. Each stream provides students with the same scientific foundation across disciplines. Health Science students are guaranteed placement in both the Human Anatomy and Physiology and Organic Chemistry courses, which will further prepare you for health or life science-related undergraduate programs. To fulfill graduation requirements and allow you to better satisfy your scientific interests, students in the Pure and Applied stream will choose two science option courses from a variety of topics. Recognizing the unique needs of Science students, the General Education components of the program have been tailored to resonate with your ambitions and preferences.

Science Program 200.B0

Application Deadline: March 1 for the Fall Semester
November 1 for the Winter Semester

Minimum Admission Requirements: Quebec Secondary School Diploma or a level of education that is deemed equivalent by the College. Even if applicants meet the requirement of the Réglement sur le régime des études collégiale, they may be refused admission due to lack of space.

Prerequisites: Mathematics TS 5 or SN 5, Secondary 5 Chemistry, Secondary 5 Physics

COLLEGESAINTE-LAMBERT

Facilities

Laboratory activities that complement classroom theory are an essential component of the program. The laboratory component of the Science Program exposes you to the necessary techniques and instrumentation that will prepare you for research in academic or industrial settings. Champlain Saint-Lambert's Integration of Science in the Laboratory course will be the culmination of your studies. In this innovative course, you will have the freedom to put your theoretical and practical know-how to the test in order to solve real-world problems.

Science Options

Health Science - The Possibilities

Dietetics, Pharmacy, Optometry, Biology, Forensics, Nursing, Nutrition, Biochemistry, Education, Dentistry, Microbiology & Immunology, Biotechnology, Chemistry, Occupational Therapy, Veterinary Medicine, Psychology (B.Sc.), Physiotherapy, Experimental Medicine.

Pure & Applied - The Possibilities

Agronomy, Chemical Engineering, Architecture, Mathematics (B.Sc.), Agricukytte, Chemistry, Forestry, Physics (B.Sc.), Engineering, Computer Science, Geology.

COLLEGESAINTE-LAMBERT

Computer Science & Mathematics

About the Program:

This program will allow graduates to pursue studies in the exciting and ever growing field of Computer Science. As a pre-university program, students are also able to enter university programs in Mathematics, Actuarial Sciences, Computer Gaming, Information Systems as well as traditional fields of study in both engineering and sciences.

The innovative computer science courses in this program will give you the chance to take your skills, interests and passion for computers and technology and turn them into an exciting base for academic studies. Students will use a program approach to present scientific solutions to problems using math, chemistry and physics. While studying Computer Science and Mathematics you will combine science and computer technology courses.

Students Will Learn To:

- Interpret and evaluate solutions and theories
- Take a systematic approach to problem solving
- Use information and communications technologies to solve problems in a scientific context
- Conduct research and carry out projects pertaining to situations, problems or issues by drawing on several fields of knowledge
- Learn to work individually and as part of a team
- Develop personal abilities in analysis and reasoning
- Conduct a comprehensive assessment in the area of computer science and mathematics

COLLEGES SAINT-LAMBERT

General Studies in Social Science (with/without Math)

About the Program:

The general profile of the Social Science program allows students the greatest amount of flexibility when selecting social science courses. It provides you with a strong background in the seven social science disciplines that will allow you to pursue studies in many programs at university and allows you to explore the social sciences before making a commitment to a particular subject or area of study. You can choose up to 8 concentration courses and can complete several university pre-requisites. Teaching in our Social Science program is structured to ensure that courses complement each other. This coherence assures that what you are learning is both practical and purposeful while preparing you for university studies. Social Science is the study of human behaviour and social phenomena using a wide variety of both qualitative and quantitative methods. Social Science involves many bodies of knowledge including anthropology, economics, geography, history, political science, psychology and sociology. Through a variety of courses, students will have the opportunity to study human interactions with other individuals, groups, institutions, cultures and societies using the tools and methods of a social scientist.

Profile of Students:

After graduating from the Social Science general profile students are able to pursue studies at the university level in any of the following disciplines, Anthropology, Communications, Education (Including Physical Education), English, Foreign Affairs, Geography, History, Industrial Resources, Journalism, Law, Literature, Philosophy, Political Science, Psychology, Public Affairs, Religion, Sociology, Specialized Writing (Economics, History, Politics), Social Work.

Students Will Learn To:

- Communicate ideas clearly in written and oral formats.
- Work effectively as a member of a group.
- Use strategies that allow you to reach your short and long-term goals.
- Develop comprehensive research skills.
- Mathematics is available to students who want to meet certain university program entrance requirements. Restrictions may apply.

Application Deadline: March 1 for the Fall Semester
November 1 for the Winter Semester

Social Science Program 300.A0

Champlain
COLLEGE SAINT-LAMBERT

Commerce/World Commerce Profile in Social Science

Commerce Profile

The Commerce profile allows you to pursue the Social Science pre-university program while also learning the fundamentals of business, economics, markets, and trade. The Commerce profile particularly focuses on a combination of courses in accounting, business, economics, and mathematics fields which are often required by business and management faculties in universities. The multi-disciplinary approach also offers students the opportunity to study history, psychology, and at least one other discipline. This provides students with a strong social science background sought by universities.

World Commerce Profile

The World Commerce profile, as an option within Commerce, allows you to pursue the Social Science pre-university program while also learning the fundamentals of business, economics, and international relations. This profile particularly focuses on a combination of courses from business, economics, mathematics, and political science fields which are often sought by business and social science faculties in universities. The multi-disciplinary approach also offers students the opportunity to study history, psychology, international politics, and international trade, thereby providing a broad understanding of the impact of culture, geopolitics, and economic realities that shape international relations.

Skills Acquired in the Profile:

- Communicating ideas clearly in both written and oral formats.
- Developing research skills by collecting and analyzing data.
- Working and thinking both independently and as a vital member of a group.
- Understanding the fundamental components of businesses and markets.

Career Possibilities Include:

Accountant, Economist, Financial Analyst, Market Researcher, Business Manager, Government Policy Researcher, Company Secretary, Capital Markets Manager, MBA, Stock Trader, Certified Professional Accountant, Investment Banker, Portfolio Manager, Cost Accountant, Insurance and Risk Manager, Tax Auditor, Lawyer.

Application Deadline: March 1 for the Fall Semester

Champlain
COLLEGES SAINT-LAMBERT

Criminology Profile in Social Science

About the Program:

If you have a taste for real-life or fictional crime stories and are intrigued by mystery, the Criminology Profile is a good fit for you. In this profile, you will explore the world of crime from a multidisciplinary perspective incorporating anthropology, history, psychology, and sociology. You will learn about criminal profiling, study notable crimes, and meet guest speakers from various fields, including homicide detectives, parole and correctional officers, youth protection workers, and recovering addicts. The Criminology Profile also provides a foundation for exploring crime scenes and solving criminal cases through skeletal analysis. Students will have the opportunity to participate in labs and investigate mock crime scenes.

Profile of Students:

This profile is designed for students who wish to pursue studies in Law or Criminology at the university level (note: this is not intended to be a pre-law program). Students may consider careers in law enforcement (such as working as correctional or parole officers, or in private policing), legal reform, and rehabilitation programs. They may also explore career opportunities in journalism, administrative and research positions within the criminal justice system, or work in policy setting and application within social and judicial agencies.

Students who complete this profile may apply to university programs in, Anthropology, Geography, History, Sociology, or Political Science.

Application Deadline: March 1 for the Fall Semester

Social Science Program 300.A0

Minimum Admission Requirements:

Quebec Secondary School Diploma or a level of education that is deemed equivalent by the College. Even if applicants meet the requirement of the Règlement sur le régime des études collégiale, they may be refused admission due to lack of space.

Prerequisites:

View the Program Grid

Champlain
COLLEGESAINTE-LAMBERT

Education Profile in Social Science

About the Program:

The Education profile will offer you different ways of looking at education. It will give you a behind-the-scenes look at schools, teaching and related concerns. You will examine education broadly to see how it fits with the rest of society and its connection with the labour force. You will look at schools from the classroom's perspective and student-teacher interaction and understand students' psychological development. You will study various social issues such as racism and sexism, to determine their impact on students, schools and society. Feasible solutions will be discussed. This profile will offer you the opportunity to take two fieldwork courses.

Profile of Students:

The Education profile of the Social Science Program is intended for students considering a career in teaching or other fields related to education. This option offers students a firm grounding in several social science disciplines relevant to education, specifically, anthropology, psychology and sociology. This social science foundation will give you a formidable background from which to pursue your teaching training courses at university. You will get a preview of what learning to become a teacher may entail, which will also help you solidify or modify your goals. While the Education profile focuses on schooling, it also provides an excellent preparation for any Arts program at university. The social science perspectives and analytical and writing skills you acquire will be profitable regardless of the path you choose.

Application Deadline: March 1 for the Fall Semester

Social Science Program 300.A0

Minimum Admission Requirements:

Quebec Secondary School Diploma or a level of education that is deemed equivalent by the College. Even if applicants meet the requirement of the Règlement sur le régime des études collégiale, they may be refused admission due to lack of space.

Prerequisites:

Sec IV Cultural, Social and Technical Math 4 (563414 or 063414)

Champlain
COLLEGES SAINT-LAMBERT

Psychology Profile in Social Science

About the Program:

The field of psychology investigates the interaction between the mind and behaviours in humans. Students intrigued by what influences behaviour, how behaviour is modified, and the different perspectives to understand this process will have their curiosity rewarded in the Psychology profile. Students will be introduced to the fundamentals of psychology and will be given the freedom to explore several specialized fields, including but not limited to performance, developmental psychology, intimate relationships and sexuality and social psychology. At the same time, students will acquire core social science and research methodology skills, preparing them for eventual university study.

Profile of Students:

This profile is for students interested in furthering their studies in Psychology at the university level. As part of the Social Science program, the Psychology profile satisfies the requirements for most Bachelor of Arts university programs. Students considering careers in counselling, communication, social work, human relations, and public relations will benefit from expanding their knowledge of psychology.

Students who complete this profile may also apply to university programs such as Anthropology, Sociology, History, Education and Law.

Application Deadline: March 1 for the Fall Semester

Social Science Program 300.A0

Minimum Admission Requirements:

Quebec Secondary School Diploma or a level of education that is deemed equivalent by the College. Even if applicants meet the requirement of the Règlement sur le régime des études collégiale, they may be refused admission due to lack of space.

Prerequisites:

International Studies Profile in Social Science

About the Program:

Are you intrigued by the dynamics of conflict and cooperation around the world? Do you seek to understand the intricate play of economic, geographic, historical, and political factors driving current global challenges? Are you interested in learning about the forces shaping the world of tomorrow, and how they will affect societies, businesses, and governments across the globe? The International Studies Profile of the Social Science program is designed to equip you for university studies with an international focus. The profile prioritizes building a solid foundation in the social sciences, particularly in the global economy, the geography of the world, 20th century history, and international politics. If you are interested in a career in government, diplomacy, journalism, law, business, or human rights or other non-governmental organizations, then this is the profile for you. Join us as we embark on a journey to shape the future together.

Students Will Learn To:

- Develop knowledge and an interest in international affairs and an in depth understanding of the impact that international forces and events have on humanity and the environment.
- Develop the ability to communicate in and about an international context.
- Develop the ability to observe, analyze and evaluate international life.
- Develop the ability to understand international events and processes in an ethical context.
- Develop the ability to work in a team and to appreciate other cultures and value systems.

Profile of Students:

The International Studies profile will prove useful to students planning a career in public service, law, journalism, or within sectors of the private industry that have international interests.

Application Deadline: March 1 for the Fall Semester

Language & Culture

About the Program:

The Language and Culture option of the Arts, Literature & Communication program is a two-year pre-university program that immerses students in the study of language, thought, culture, and national traditions while encouraging trans-national approaches and cultural plurality. Our goal is to enable students to develop communicative skills in Spanish and Italian and provide critical tools to understand the complexities of cultural traditions.

Gone are the days when students would study languages with the sole intention of pursuing a career in translation or interpretation. In today's global job market you will find many professionals, business executives, diplomats, economic and market analysts and journalists with a degree in Languages and/or a degree in the Arts. Cultural adaptability, critical thinking and reasoning, problem solving and adeptness in multiple languages are skills that are sought after by many employers.

Studying Language and Culture at Champlain College Saint-Lambert is the first step to widening your inter-cultural awareness and providing you with valuable communicative skills that will help to prepare you for a global job market.

The Possibilities:

Corporate Law, Immigration Law, Communication Studies, Art History and Communication Studies, Linguistics, Journalism, History, Languages, Industrial Relations, Sociology, Community, Public Affairs and Policy Studies, Teaching English as a Second Law Language, Undergraduate Leading to a Teaching Certification.

Arts, Literature & Communication Program (500.A1)

Digital Arts & New Media

About the Program:

Digital Arts & New Media is one of two interconnecting Media profiles in the Arts, Literature and Communication program. This exciting pre-university program prepares students for a wide variety of university studies and careers. Through the program's dynamic mix of theory and practice students learn a variety of techniques in studio arts & digital arts and develop their understanding of visual culture.

Students Will Learn To:

Students will learn digital 2D design and 3D modelling along with the fundamentals of traditional artistic techniques. The courses are designed to develop communication skills and critical thinking through a variety of creative approaches that include drawing, assemblage, sculpture, digital imaging, animation, and 3D modelling. The practical courses are complemented by theoretical courses and general education courses, all which foster critical thinking and prepare students for future studies at university.

The Possibilities:

Graduates of Digital Arts and New Media are prepared for a wide variety of university programs including computation arts, animation, videogame studies, industrial design, art education, art history, and scenography.

Film & New Media

About the Program:

Film & New Media is one of two interconnecting Media profiles in the Arts, Literature and Communication program. This pre-university program is an exciting mix of theory and practice that gives you a chance to experiment and create using a variety of media.

Students Will Learn To:

In the Film and New Media profile, you will progressively master the fundamentals of writing, shooting, recording sound, and editing, whether in fiction film, television, animation, radio or any number of multimedia platforms. Through written and visual communication, you will sharpen your creative abilities, critical thinking, and academic skills. The courses take place in our exciting television studio, workshop spaces and digital lab. In the journalism and documentary courses you will apply your creative and technical skills to the telling of real-life stories that are important to you. In the filmmaking classes, you will invent your own stories and learn how to bring these ideas to screen. You will also have the chance to experiment in special effects and animation as well as develop your sense of critical thinking through subjects that vary from film history to the analysis of contemporary visual culture.

The Possibilities:

In our media saturated world, visual literacy is more important than ever. Our graduates are able to transfer their learning into almost any field requiring an understanding of the creative process, self-motivation, and project management abilities. Our graduates have found careers in film production, television, radio, animation, computer gaming, special effects design, app design, music production, photography, acting, advertising, marketing, journalism, public relations, education and many other fields. Join us and prepare to engage in exciting studies that will open doors to a world of possibilities.

Law and Civilization (with or without Math)

About the Program:

Our students receive a well-rounded education based on interdisciplinary studies exploring ideas and knowledge-building skills in law, history, philosophy, religion, art history, social sciences, natural sciences, and mathematics.

Our students will benefit from an environment where faculty and students work together in a community dedicated to learning.

Our students will develop as individuals and gain self-confidence through team-building, problem-solving and cooperative projects.

Our students will develop critical thinking and study skills while expanding oral and written communication skills.

Our students will have an opportunity to participate in extra-curricular activities such as concerts, plays, movies, field trips, and more. These activities will help broaden and further enrich our students' understanding of Liberal Arts from outside the classroom.

We are the only CEGEP to offer two unique options under the Liberal Arts Program.

Nursing

About the Program:

Nursing is a three-year program that blends classroom studies and nursing labs with clinical fieldwork in various hospitals and healthcare facilities.

Our mission is to develop graduates recognized as outstanding nurses providing compassionate and quality care, focusing on the unique needs of patients and their families.

Students experience a variety of Francophone and Anglophone clinical settings such as emergency, medical and surgical care, pediatrics, maternity, ambulatory care, mental health and gerontology. A DEC in Nursing will provide an opportunity to write the provincial licensing exam in order to begin employment as a registered nurse. Our graduates also have the opportunity to pursue continued studies in the DEC-BAC program with a university in Quebec, such as McGill University, Université de Sherbrooke and Université de Montreal.

A small innovative program with all the resources of a large nursing program. A bilingual program with Francophone and Anglophone clinical settings that meet the needs of today's society. A program based on the McGill Model of Nursing with a Strengths-Based Nursing philosophy. New laboratory facilities and Simulation Centre, including a virtual reality lab.

In order to become a practicing nurse, graduates must pass the l'Ordre des infirmiers et infirmières du Québec (OIIQ) licensing examination. Students must also demonstrate their ability to function in French in order to meet the needs of their clientele, thus they may be required to pass an examination set by the Office québécois de la langue française (OQLF).

Minimum Admission Requirements:

Quebec Secondary School Diploma or a level of education that is deemed equivalent by the College. Even if applicants meet the requirement of the Règlement sur le régime des études collégiales, they may be refused admission due to lack of space.

Additional Minimum Requirement

Letter of Intent
Must be eligible to take Français et communication 602-101
It is recommended that candidates have completed Sec IV Mathematics Technical & Scientific Option (064406 or 564406) or Mathematics Science Option (065406 or 565406) or Math 436 or Math TS 4 or SN 4.

Prerequisites:

- Sec IV Environmental Science & Technology (058-404 or 558-404) or Sec IV Science and Environment (058402 or 558402) or Physical Science 436
- Sec V Chemistry (051-504 or 551-504) or Chemistry 534. Adult Education Equivalences – PSC 4010, 4011 & 4012, Chemistry 5021, 5042, & 5043 with labs.

Sport Marketing & Management Option in Business Management

About the Program:

The Sport Marketing & Management option of the Business Management program is a three-year program designed to prepare students for careers in a wide range of sport-related enterprises. It is designed for the student who enjoys having responsibility, taking initiative, dealing with the public and being part of a team.

This three-year technical program has a practical approach to learning using simulations, case studies, and assorted software applications. Students will have the opportunity to complete fieldwork or to develop a project through an independent study in sport. Sport Marketing & Management will give the knowledge and skills needed to succeed in business and can lead to a career that is both challenging and rewarding.

The Possibilities:

The aim of the program is to prepare students for management or marketing positions in: sports marketing companies, sports and communication firms, amateur athletic organizations, corporate fitness and wellness programs and professional sports teams/leagues.

Entrepreneurship Option in Business Management

About the Program:

The Entrepreneurship option of the Business Management program is a three-year program designed to provide students with all of the necessary skills and knowledge needed to build and operate a successful business. Our curriculum covers a broad spectrum of competencies in the areas of marketing, finance, accounting, sales, products & services, online ventures (e-Commerce) and legal issues with a focus on best practices required for Quebec and international businesses.

Our program includes a unique and innovative approach to the business world. The “Incubator” component offers students the opportunity to put into practice the theoretical portion of the program by designing and launching their own business. The Incubator courses include the essential business principles related to funding, investment, strategic planning, facility planning, coaching, cost assessment as well as needs in human resources.

Students Will Learn To:

- Start-up a business from A to Z.
- Acquire a franchise in pre-established companies.
- Foster the continued development of family owned businesses.
- Manage aspects of a commercial project.

Computer Science Technology

About the Program:

The Computer Science Technology program is a comprehensive three-year career program crafted to furnish students with a robust foundation in object-oriented methodology, with a specific emphasis on program design and system analysis. The curriculum integrates web concepts across courses, enabling the development of dynamic, database-driven web applications across various operating system platforms. This program diligently focuses on key areas including computer programming, operating systems, database and web technology, data communication and networking, security, and advanced programming languages. Students enrolled in the Computer Science Technology diploma program will benefit from state-of-the-art facilities, combining theoretical classes with practical laboratory sessions. This blend ensures exposure to the latest software versions, complementing academic learning. Each student also gains access to these software tools on their personal devices through our academic partnerships with leading software vendors. The program offers a well-rounded technological education that primes graduates for roles as developers, technicians, or administrators across various industries.

Students Will Learn To:

Object-oriented methodology, Problem Solving, Programming Languages, Modern Systems Analysis and Design, Operating Systems, Database design and administration, Client-server development, Cloud development, Distributed Systems and Micro Services, Computer and networking support, Information Systems Security, Internet of Things (IoT), Mobile app development, Game development.

The Possibilities:

Prepare to embark on a fulfilling career path in roles such as software developer, information systems specialist, and PC administration among others. The technical and business acumen developed during the program positions you ideally for some of the most sought-after and dynamic positions in today's tech-driven markets. Furthermore, the program provides a solid groundwork for students wishing to pursue further studies at the university level in software engineering, business, or other science fields.

Application Deadline: March 1 for the Fall Semester

Computer Science Program (420.B0)

Minimum Admission Requirements:

Quebec Secondary School Diploma or a level of education that is deemed equivalent by the College. Even if applicants meet the requirement of the Réglement sur le régime des études collégiale, they may be refused admission due to lack of space.

Prerequisites:

Mathematics TS/SN4 or CST 5

Student Life

Champlain College offers a wide range of student-centered activities throughout the academic year, both on and off campus. From academic excursions and student-led competitions to social and community events, there is something for everyone. The College aims to support student passions by encouraging active participation and leadership in organizing events and initiatives. Involvement in cultural, social, and community-based experiences is also promoted to help students broaden their perspectives and strengthen their connection to the Champlain community. Students are encouraged to engage fully and make the most of their college experience.

iLEAD Leadership Program

The iLEAD Leadership Program is built on the Social Change Model, which emphasizes inclusive, values-based leadership development. It offers students a range of opportunities to explore and strengthen their leadership potential, whether or not they have prior experience or currently hold a leadership role on campus. The program is designed to be accessible to all students and encourages personal growth, collaboration, and positive community impact through active engagement. Students who participate in the program also gain access to leadership seminars and off campus retreats designed to further support their development.

FLIP

Focused on supporting new students as they transition into college life, FLIP Leaders work collaboratively with campus groups to foster a sense of community by organizing inclusive and engaging activities. Through regular meetings, they develop creative initiatives that help connect students and enrich campus life.

The Peer Mentorship Program Peer 2 Peer

Matches first year students with second or third year student mentors who can help guide and support them through their first semesters at Champlain. Whether bonding over lunch about their courses or providing assurance that they won't always be feeling lost, the goal of Peer 2 Peer is to reduce isolation and promote connections here at Champlain College.

Champlain Student Association (CSA)

The CSA represents the student body and serves as an active voice for educational, social, and cultural initiatives on campus. It plays a central role in the funding and organization of student clubs, events, and activities, and works to promote student engagement across all areas of college life. As a student-led association, the CSA advocates for student interests, collaborates with college administration, and helps foster a vibrant, inclusive, and dynamic campus community.

Champlain Students Embrace Diversity

Students are encouraged to experience the varying cultures and community groups which make up our college. Each year, the Multicultural Community (MCC) and Black Lives Ally Mission (BLAM) student groups organize a variety of events such as Black History Month, Multicultural Week, and many more, to promote the importance of diversity and sense of community on campus.

Millennium Certificates

Champlain Saint-Lambert offers a unique set of certificates that all students can pursue, regardless of their program and without extending their degree. Under the guidance of a faculty mentor, participants earn points toward their certificates through course work, independent study, and extra-curricular activities. The program helps foster intellectual curiosity and provides additional recognition for motivated students. The current areas are: Critical Race Studies, Democracy and Social Movements, Environmental Citizenship, Gender Studies, Indigenous and Decolonization Studies, Technology and Society and Health and Wellness.

Campus Life Activities

Anime/Video game overnight events, Art festivals, Black History Month, Charity Week, Dance and Music shows, De-Stress Week, Earth Week and environmental activities, Financial literacy workshops, Food drives, iLEAD leadership retreats/seminars, Intramural sports, Job and Volunteer fairs, Math competitions, Mental Health and Wellbeing Month, Model UN conferences, Movie nights, Multicultural festivals and block parties, Open gym and weight training, Poetry In Voice, Programming and engineering challenges, Quebec Association of Student Activities and Competitions (QASAP), Recreation and Wellness classes, Relay for Life, Réseau intercollégial des activités socioculturelles du Québec (RIASQ), Semester Planner/Saver, stand-up comedians, CSA Study nights, Suicide Prevention Week, TEDx events, Theatre productions and more!

The Champlain Cavaliers

The Champlain Cavaliers Intercollegiate Program currently has 10 teams competing in 7 sports at different levels in the Réseau du sport étudiant du Québec (RSEQ). The Cavaliers currently field teams in Badminton, Basketball, Cross-Country Running, Flag Football, Football, Soccer, and Volleyball. With an average of 225 student-athletes on their teams, the Cavaliers have captured numerous regional and provincial championships since they started playing back in 1974. In addition to leaving a mark at the local level, the Cavaliers have also been a force nationally, as a member of the Canadian Collegiate Athletic Association (CCAA). Our D1 Basketball and Soccer teams, as well as our Cross-Country Running teams continually rank amongst the top colleges in Canada.

With more than 60% of our student-athletes maintaining an 80% or higher academic average, quite a few of our student athletes have gone on to compete at the USport and the NCAA levels while continuing their post-secondary studies, while others have competed at the international level or played in professional leagues. The Cavaliers have a proud history. We want our student-athletes to develop and succeed in the classroom and on the field of competition. We want to see you become a part of that tradition.

For more information on our Cavaliers teams, please visit www.champlaincavaliers.com. Follow us on Facebook, Instagram (champlain.cavaliers) or YouTube (theChamplainCavs).

Academic Coaches on Campus

Academic coaching is available to all our intercollegiate student-athletes by one or more volunteer staff or faculty members. Student-athletes meet with their academic coaches regularly throughout the academic year. These meetings provide an opportunity for our academic coaches to offer support, feedback and identify the best resources that will help

the student athletes academic success. This one-on-one relationship benefits our Cavaliers by developing stronger connections and a better understanding of the support services provided by the College.

RTP Athletic Therapy

RTP Athletic Therapy is a private clinic that offers specialized injury management services including intervention, evaluation, treatment and prevention of musculoskeletal injuries, as well as bracing services and direct access to a variety of healthcare professionals. The clinic extends these services exclusively to intercollegiate athletes most weekdays between 4:00 - 9:00 p.m. and works with student athletic therapy interns from the Concordia University Athletic Therapy Program to help all of our athletes get back in the game. RTP is located in room D-123 next to the gymnasium and also offers private appointments to the Champlain community and to the public.

Campus Recreation and Intramural Sports

Full-time day students have the opportunity to participate in both indoor and outdoor recreational sports and activities. The gym and dance studios are available for students to use from 12 p.m. - 1 p.m. on Mondays, Tuesdays, Thursdays and Fridays. On Wednesdays, during Free Block, these areas are open between 12:30 – 2:30 p.m. These open gyms allow students to play badminton, basketball, or whatever activity is being offered that day.

Organized intramural league play takes place during the Free Block on Wednesdays between 12:30 - 2:30 p.m. Intramurals are recreation-based leagues that are held over a few weeks during each semester. They are open to all full-time students, faculty and staff and are free! Don't get too carried away – these games are played for fun with other Champlain students. Intramurals are open to all – no need to be a top prospect – and any and all skill levels are welcome.

Games are played in the gym or outside on the nearby Seaway Park fields. Past intramural sports have included Badminton, Basketball, Cosom Hockey, Dodgeball, Flag-Football, Soccer, Ultimate Frisbee and Volleyball, but we're always looking for new ideas and sports to try! Please don't be shy about sharing new ideas with our intramural and recreational staff!

CSA Fitness Centre

The CSA Fitness Centre offers the opportunity for students to work out and train throughout the day. Open from 7:30 a.m. to 6p.m Monday to Friday, this new facility is open to all Champlain students to help them obtain or maintain their well-being. The CSA Fitness Centre also offers specific training sessions and opportunities throughout the year, like boot camps for group and beginner sessions.

Fees, Financial Aid, Scholarships

Student Fees Per Semester

For all students:

\$30 Application Fee

\$235 Semester Fee

(Includes optional \$15 Foundation Fee)

Additional Fees Required:

Quebec Non-Resident - \$1,870 per semester

International Students - \$7,354 per semester

All fees may be paid online through your Omnivox account. Fees are subject to change without notice.

Financial Aid

Located in the Student Services, the financial aid office works with students to ensure they have the financial resources to remain in school. This can include financial planning, government loans, bursaries, the College Foundation emergency loan program, the food bank and the College community kitchen.

Scholarships

Champlain College Saint-Lambert offers a Scholarship Program for incoming, current and graduating students. The scholarships are awarded to the student in each program with the highest entering academic average among students with averages of 80% or higher.

Scholarships totaling approximately \$10,000 are awarded each year. At the end of their studies, graduating students are eligible for various awards, medals and prizes such as the Lieutenant Governor Award, the Board of Governors Award and the Quebec Association of Retired Teachers prize. Champlain College Saint-Lambert is proud to have mentored five winners of the prestigious Loran Scholarship (valued at approximately \$100,000) and most recently the recipient of a Schulich Leader Scholarship (valued at \$80,000). Our graduates have also been awarded entrance scholarships to universities such as McGill, Concordia, Université de Montréal, HEC and Queen's University.

How to Apply

Advanced Standing Applicant

Students applying from other Quebec Cégeps, private colleges, and other government-approved college level institutions must submit a student copy of their transcript when applying. Upon admission, their official marks will be obtained directly from the Ministry of Education and will be integrated into their Champlain College Saint-Lambert record. Not all courses will necessarily be integrated.

Equivalence

Equivalences for courses taken at post-secondary institutions other than Quebec Cégeps, private colleges or other government approved college level institutions are considered on a course-by-course basis by the Academic Advisors. Credit will not automatically be given for years or full semesters of study. Champlain College Saint-Lambert does not normally grant equivalent credit for courses followed at the university level. No request for equivalent credit will be considered until the following documentation has been submitted:

- A detailed description of the course content
- An official transcript

Applicants can apply by accessing the College website at champlainsaintlambert.ca

Application Deadline: March 1st for the Fall Semester / November 1st for the Winter Semester
